Facilities

Prohibited the distribution or copying of content

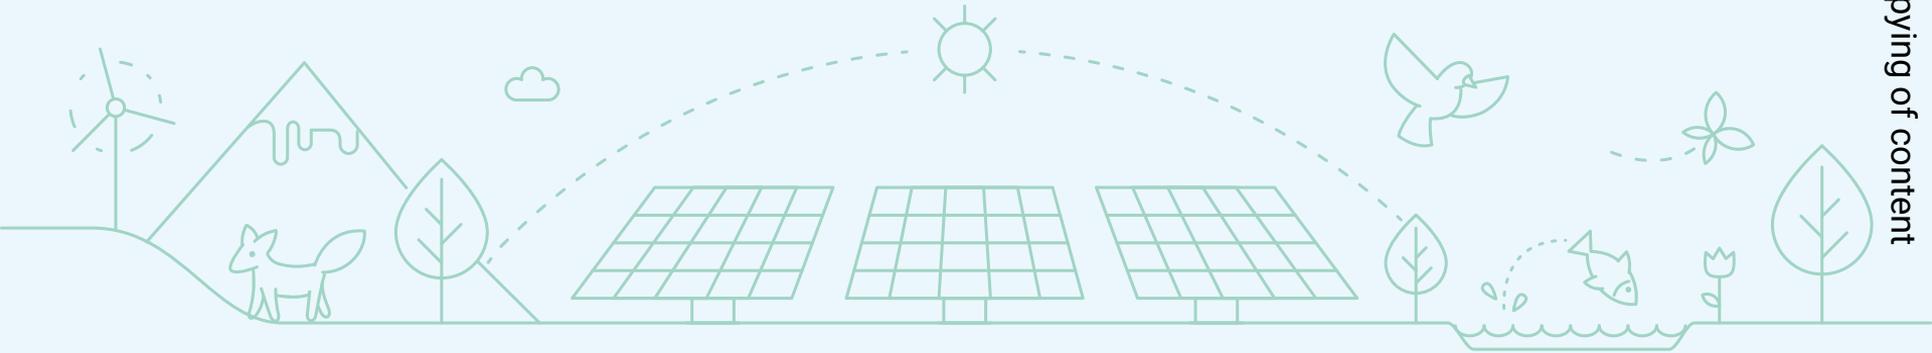

Bramp and the Environment

464 ton CO₂/year

Avoided CO₂ emission

893 MWh

Production in average year

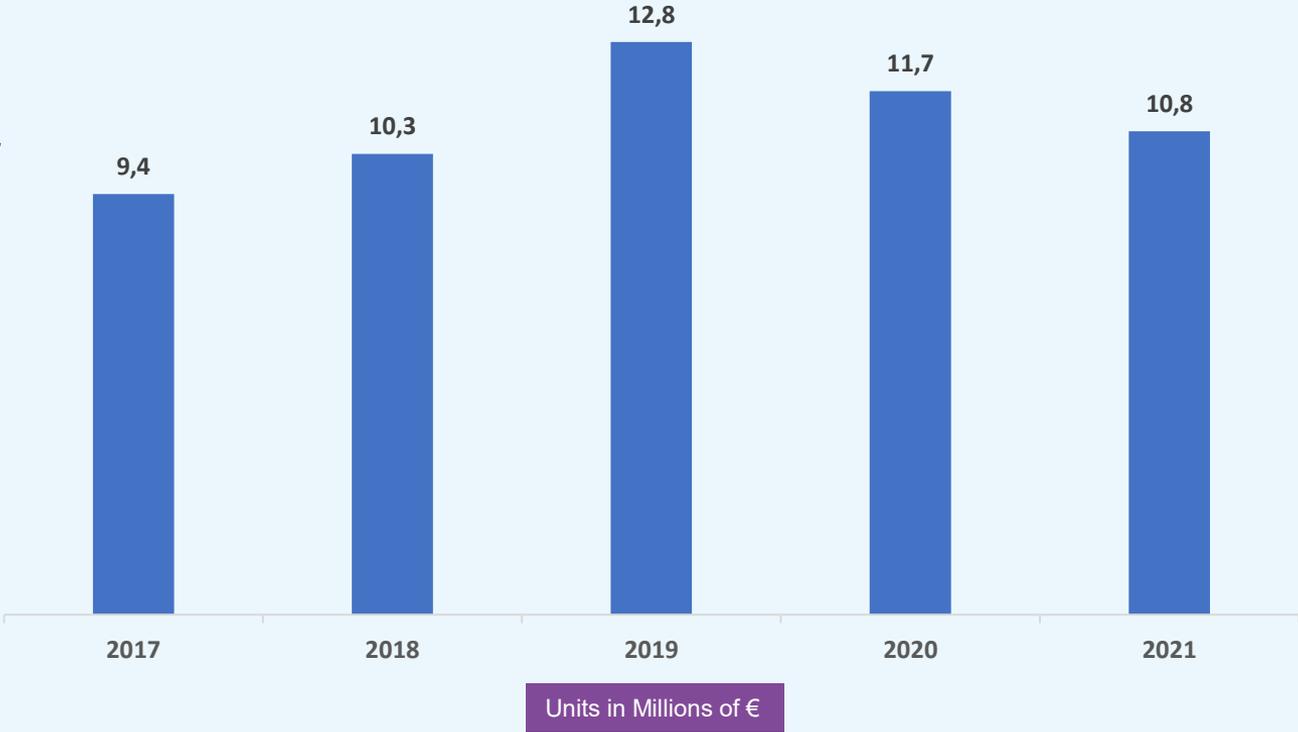

Strategic Goals

Consolidate the position of technological partner, of high performance and assurance, based on a permanent posture of innovation in terms of product, process and organizational system.

Assuming as a Mission

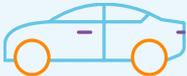

Provide plastic parts and processing tools with high specification level, accompanied by technical services which ensure the Customer satisfaction.

Turnover

Prohibited the distribution or copying of content

Markets

Automotive

**Safety and
Transportation**

**Electric and
Electronic**

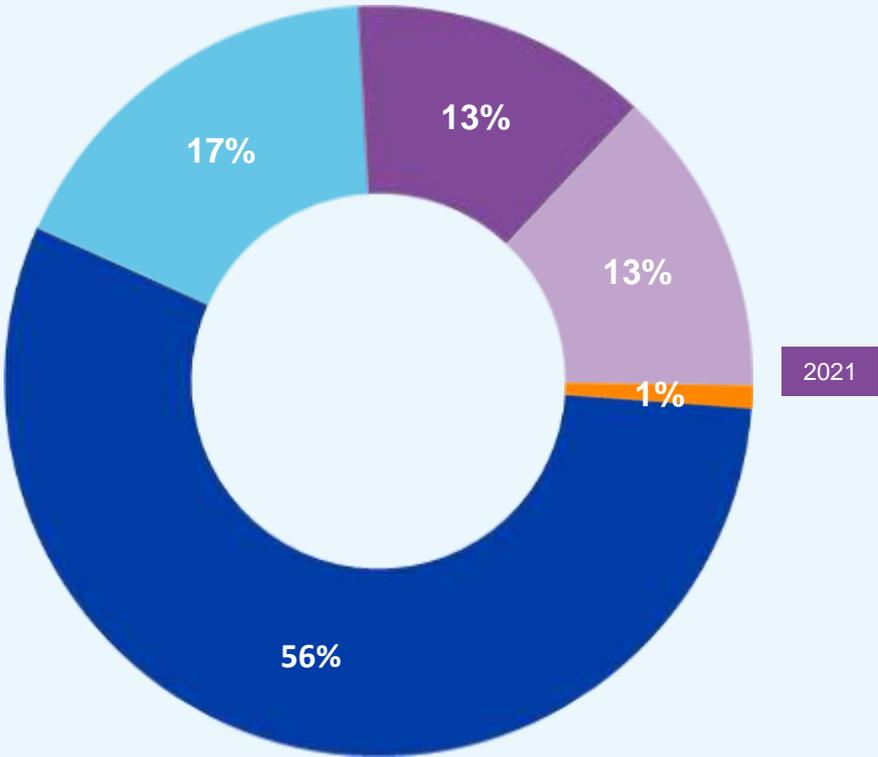

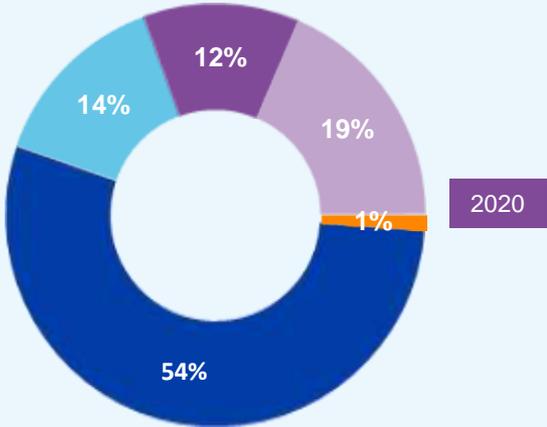

**Home
Appliances**

Houseware

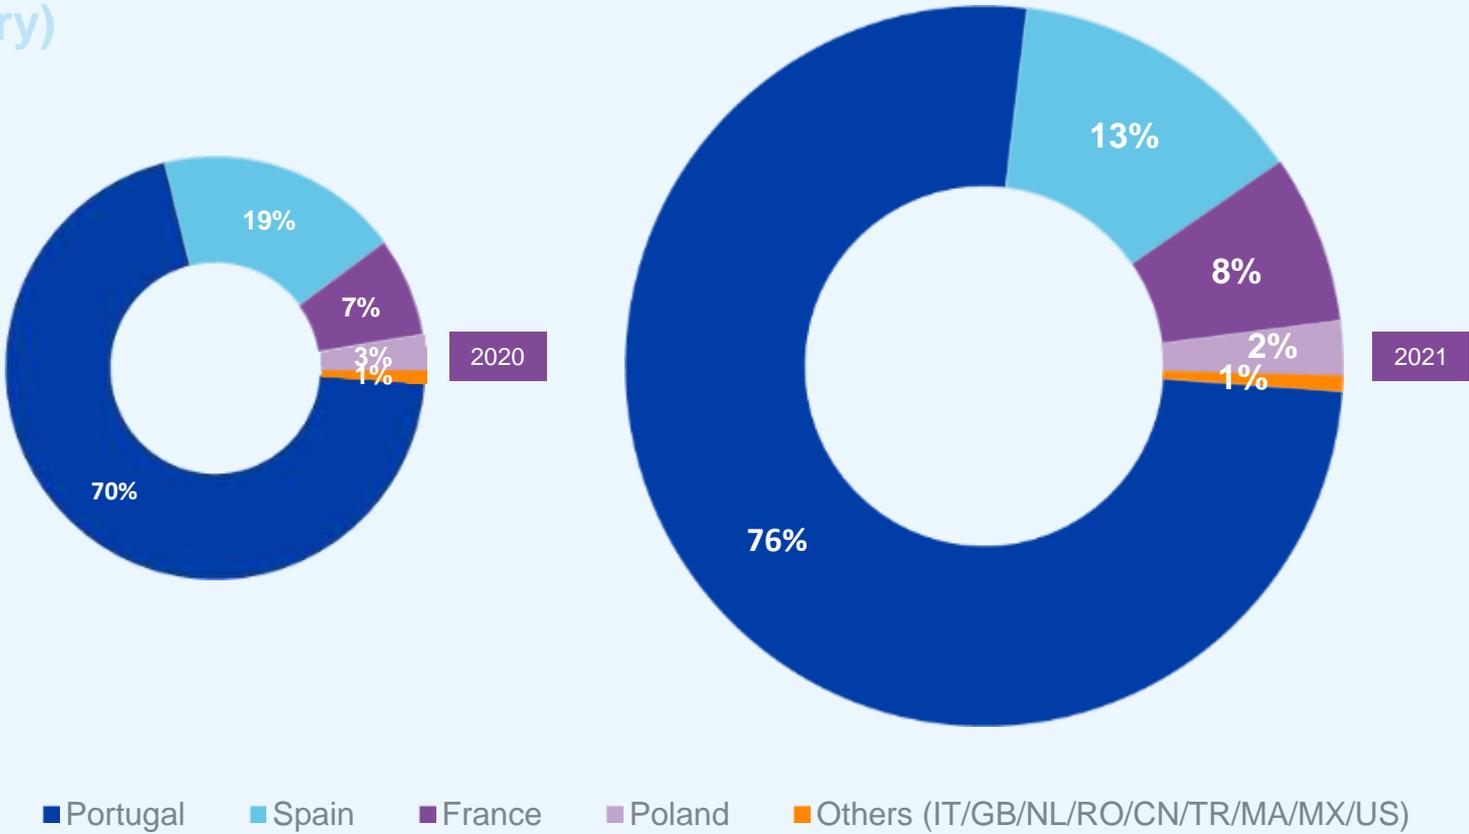

Market Share (Sector)

- Automotive
- Electric and Electronic
- Safety and Transportation
- Houseware and Household items
- Others

Prohibited the distribution or copying of content

Market Share (Country)

Prohibited the distribution or copying of content

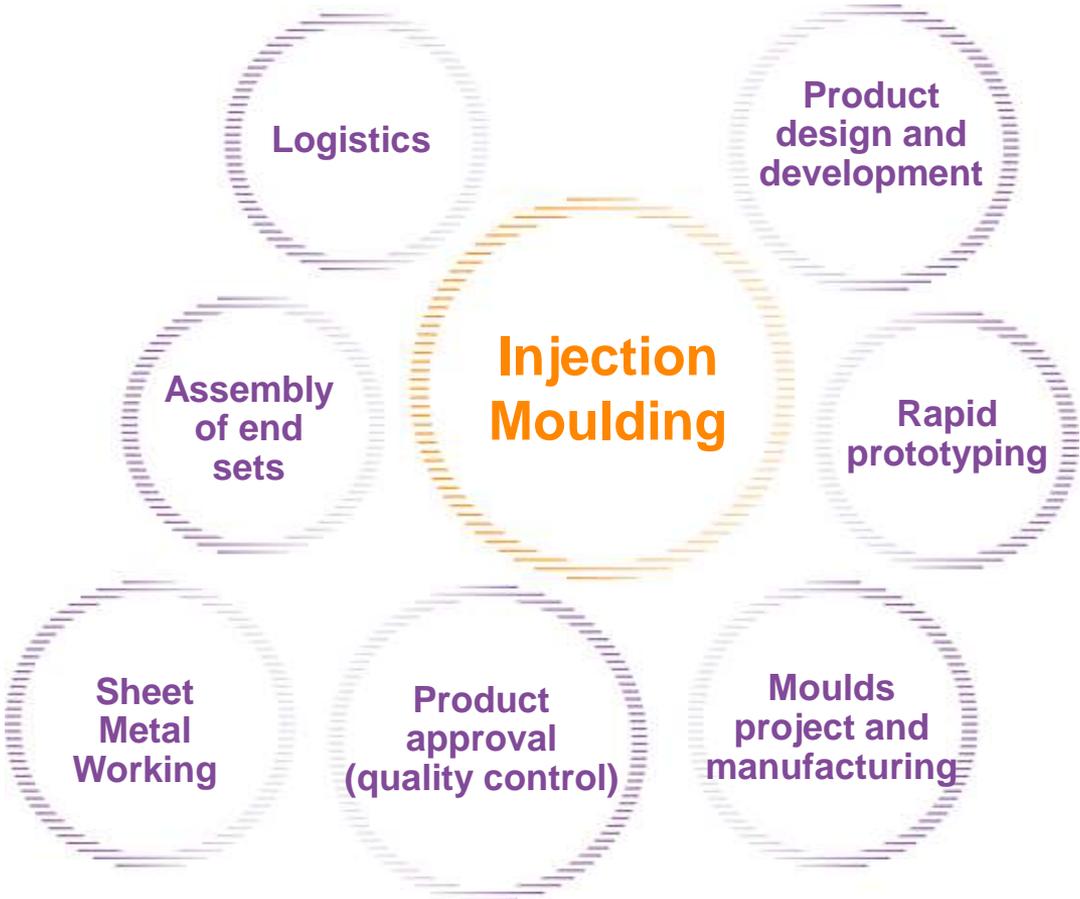

Intervention Areas

Accordinging:

NP EN ISO 9001:2015

IATF 16949:2016

NP EN ISO 14001:2015

Intervention Areas

Product design and development

Product development

Part Assessment
(CAD/CAE analysis)

Reverse engineering

Raw materials

Manufacturing

Prohibited the distribution or copying of content

Intervention Areas

Rapid Prototyping

FDM Technology

Fused Deposition Modeling

ABS

PC

PC/ABS

PA

ASA

Intervention Areas

Moulds project and manufacturing

Prohibited the distribution or copying of content

Intervention Areas

Moulds project and manufacturing

Equipments

CNC Machining

Electric Discharge Machining

Grinding

Turning

Laser Welding

Intervention Areas

Injection Moulding

67 Injection Machines from 15 ton up to 1100 ton

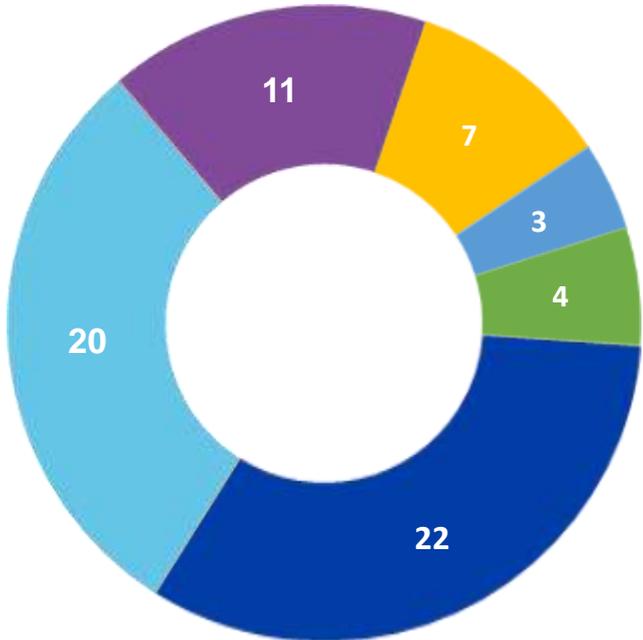

Intervention Areas

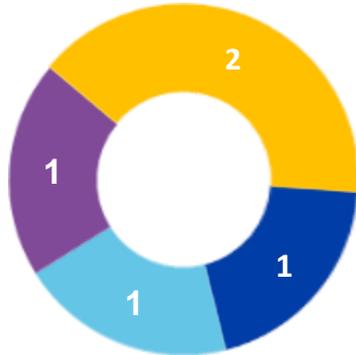

Injection Moulding

Machines

- 15-99 ton
- 100-199 ton
- 200-299 ton
- 300-399 ton
- 400-699 ton
- 700-1100 ton

For Bi-Injection

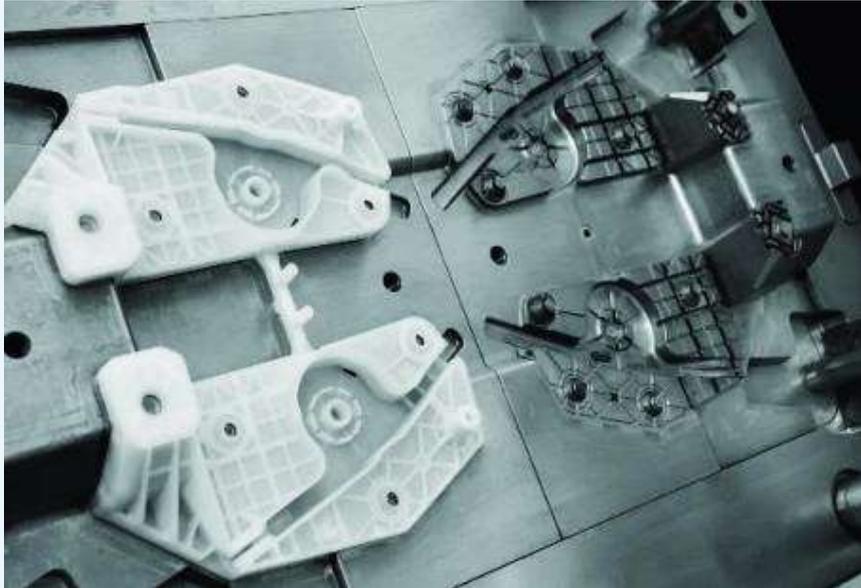

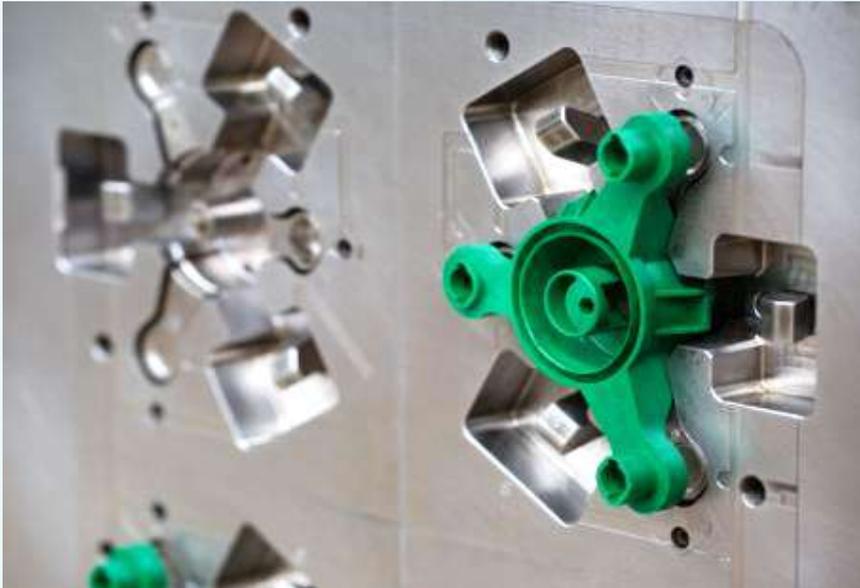

- 130 ton
- 220 ton
- 280 ton
- 400 ton
