

AMPERE

CUSTOMIZE INNOVATIVE SOLUTIONS

Your reference partner for all your electrical solutions - cabling -
wiring harnesses - electromechanicals

Our history

The **AMPERE** group was born of the ambition of one man and his teams. Founded in 1990 with the takeover of a company in the Rhône-Alpes region, the group has been strengthened its position 27 years later with the acquisition of an entity in the Deux-Sèvres region, thereby consolidating its development. With **five production sites** around the world and the expertise of **1,000 employees**, we have developed solid know-how in **electrical solutions, cabling** and **electromechanicals**.

Our vision

To be a reference in cabling, wiring harnesses and electromechanicals in France and Europe.

Our solution

A design office with 45 technical experts, dedicated to **innovation** and **co-design** of your products.

Our 5 production sites in France and North Africa (Tunisia and Morocco) guarantee **flexibility, responsiveness** and **proximity**.

A single information system: centralised purchasing, decentralised supplies for our production sites.

A design software package created by and for our group, Photon designs and prints your drawings to scale 1 on a table, guaranteeing optimum precision for the manufacture of your wiring harnesses.

Our **certifications** are proof of the quality standards we set ourselves for **each and every one of your productions**.
