**INNOVATION
IN SERVICE OF QUALITY !**

About us

GRALCOME LLC, established in the late '90s, initially focused its expertise on the manufacturing of precision mechanical parts, wear components, anti-wear coatings, precision machining, and boilerwork.

Over time, the company has built a strong reputation for delivering high-quality solutions in these areas, meeting the requirements of numerous discerning customers.

The Quest for excellence in our production processes

From the grinding of raw material, through the crushing and mixing processes, to the extrusion, our products meet the needs of our customers to achieve the best result !

GRALCOME LLC has the expertise to find solutions that will keep your operation running at peak productivity.

all parts for red
brickworks
machines

We are determined to guarantee the durability of your wear parts, this is our mission and our commitment.
[All wear parts of Brick Molding Machines, Brick Extruders...]

The process of brickmaking

The brick manufacturing process is subject to significant wear on all parts of the machinery. This is primarily abrasion wear combined with other factors such as heat, humidity, and gases.

As a leading Algerian provider of brickworks wear parts, SARL GRALCOME offers its customers its expertise in the manufacturing, repair, renovation, and recharging of wear components for brick-making machines.

1. Doser Feeder

- Slat conveyors
- Rollers and shafts

2. Primary Crushers

- Discs
- Hammers
- Shafts
- Gear reducers

3. Disintegrators

- Blades
- Counter-Blades
- Scrapers
- Protective linings

4. Moistener Mixer

- Paddles
- Paddle shafts
- Paddles Hub
- Tank protective linings

- Shafts
- Shafts protective linings
- Gear reducers
- Screw conveyor cone

5. Reclaimers

- Buckets
- Chains, rollers and shfats
- Wheels

6. Extrusion Unit [Extruder-Mixer]

- Lower cone
- Upper cone
- Center cone
- Mixing grids
- Shreddes
- Combs
- Augers
- Anti-wear linings
[Made of anti-wear concrete]
- Vaccum chamber linings
- Uncoiler

- Paddles
- Paddle shafts
- Paddle hub
- Protective tank linings
- Shafts
- Shafts protective linings
- Gear reducers
- Mixing augers
